

## Stock Production Equipment

*With consideration to the Producer's increased requirement to optimize cash flow, and ensure that drilled wells are placed on stream to provide revenues as quickly as possible, Propak has reacted to industry requirements and is now pre-building a range of processing equipment which was previously only available on a custom-built basis.*

### **A. GAS COMPRESSORS (NEW & USED)** - All units are fully modularized packaged gas compressor units, designed for sour or sweet gas.

Model #	HP	Engine	Compressor	Details	Availability
